Corrected Vision Now, Means Better Eyesight Later

How many times a day do people rub their eyes and say, "Golly I've had sort of a headache all afternoon," and then proceed to take a dose of something. They never think their eyes have anything to do with it.

Success Demands Good Eyesight

One third of the total brain area is someway concerned with the sense of sight. If the eyes are straining, correct mind action is interfered with. Concentration suffers. In gaining an education or in following one's vocation, the handicap is tremendous and should not be tolerated for a single unnecessary day.

OUR AIM IS THREE FOLD:

- 1st. To measure the optical state of the eye with scientific exactness and painstaking care.
- 2nd. After the formula is written to fashion the best glasses that skilled workmen and modern instruments can produce.
- 3rd. To pay special attention to the way your glasses will look. They should look as though they were made for you. This is an art in itself.

SIR WILLIAM CROOKES GLASS

Crookes Glass is a kind made from a special formula which took Sir William Crookes three years to attain. Lenses ground from it filter out the irritating element from the light, but look like ordinary lenses. We grind them in our laboratory.

SIR WM. CROOKES

WE MAKE KRYPTOK BI-FOCAL LENSES

For the kind of eye that needs a different correction for far and near vision, these two-sight lenses are excellent. They show no seam and the vision is clear both far and near.

We ground the first Kryptok lenses ever made in Canada, thirteen years ago.

S. BERING, Optometrist
