Spinal adjustments releases the **POWER WITHIN**. When the nerve, over which the "power within" sends its adaptative impulses to the cells is impinged by a subluxated vertebra, the "power within" cannot adapt the organism to the stress of environment and we become sick. To regain **HEALTH** it is necessary to turn on the power of adaptation—resistance.

To Turn on the power, the impingement must be removed from the nerve so it can function normally.

To remove the impingement the misaligned vertebra must be adjusted, and this adjustment of the spinal vertebra is the work of the chiropractor.

Vibrapac Concrete Masonry Units

Offer These Advantages . . .

FIRE SAFETY . . .

Tests show that Concrete Masonry walls will stand hours of terrific heat with slight, if any, damage.

LOW INSURANCE . . .

Concrete does not burn. Insurance rates are lower on buildings of Concrete Masonry units.

ARCHITECTURAL BEAUTY . . .

Concrete Masonry units are a versatile building material of lasting beauty adaptable to any style of architecture.

STORM SAFETY . . .

Where hurricanes, tornadoes and earthquakes occur, buildings of Concrete Masonry construction prove to be the best protection against damage.

TERMITE PROOF . . .

Termites can't touch Concrete Masonry units. They exist and thrive on cellulose. There is no cellulose in concrete.

LOW COST . . .

Concrete Masonry units are reasonable in price, fast and easy to lay, resulting in lower building costs.

LIFELONG DURABILITY . . .

Concrete does not deteriorate. It grows stronger with time. Concrete Masonry walls will keep their appearance and fine condition for generations.

SANITARY . . .

The solid, tightly fitted construction of Concrete Masonry units leaves no dirt catching crannies, allows no sifting of dust through cracks.

RODENT RESISTENT

The "tight" construction possible with Concrete Masonry units effectively keeps rodents and vermin out. They can't gnaw through concrete.

SELF-INSULATED . . .

Concrete Masonry units of "hollow molded design" have, natural insulating qualities and even more so when cellular aggregates are used in their manufacture.
