"CAN'T HEAR"

New Approach to Correction of Hearing Problems

"Every hearing problem is different and must be treated as an individual situation."

1. Some people can understand conversation with one person, but are confused in larger groups.
2. Some hear men's voices clearly but cannot understand women or children.
3. Some hear naturally in a small room but miss everything in church or at lectures.

I have my instruments custom built at the AUDIO-TONE laboratories to specifically overcome each of my patient's personal hearing problems. The results are phenomenal. I cannot conscientiously recommend any other method.
