**SILVER CLEANER**  
 To clean your silver. Mix one-half cup of salt and three-fourths cup of soapflakes with sufficient cold water to cover the silverware laid in an aluminum pan. Bring to a boil, then wash the silver in hot soapy water. **CAUTION:** Do not use on filigreed silver. Solution may remove the oxidation in the intricate designs and it will take some time for them to darken again.

**SILVER CLEANING**

To clean your silver. Mix one-half cup of salt and three-fourths cup of soapflakes with sufficient cold water to cover the silverware laid in an aluminum pan. Bring to a boil, then wash silver in hot soapy water. CAUTION: Do not use on filigreed silver. Solution may remove the oxidation in the intricate designs and it will take some time for them to darken again.

**ADD AFTERWARDS**

If a fabric softener is to be used, it should be added to the final rinse water after clothes have been thoroughly rinsed of soap or synthetic detergent residues.

When in doubt about a telephone number, please look in the telephone directory first.

That helps you, helps others, and helps telephone people to do a better job for you.
