Keep watching the dial . . . and you'll dial accurately. Remember to pull the finger all the way to the stop . . . let the dial return at its own speed. Speeding up or slowing down the dial's return may interfere with perfect operation of the equipment for you.

Have the right number when you call. It's natural to trust to memory but when memory plays tricks with a telephone number, you're delayed. When you are not sure of a number won't you look it up in the telephone directory?

**4 GOOD REASONS FOR
HANDLING COMPLAINTS
BY LONG DISTANCE**

You can talk over matters at once. Promptness often prevents loss of a customer.

You can build closer relations with customers.

You can use tact in delicate situations. And because men talk more freely than they write, you can frequently trace the real reason for the complaint and prevent similar complaints in the future.
