**In Your  
Own Words**

The classifications in the  
**Yellow Pages** are chosen  
from a study of the terms  
buyers use to describe  
what they want.

That's why  
it's so easy  
to use.

Telephone calls used to be a scream  
but today, a normal voice  
will do. The difference is improved  
transmission—better ways to get your  
voice from here to there. Simply  
talk in a normal tone of voice into  
the receiver and your words will go a  
long way.

## DIAL A WRONG NUMBER?

If you reach a wrong number, ask the person who answers for the name of the city you reached. Then dial the Operator right away and give her this information. That way, you won't be charged for the call.

It's easier to understand  
and jot down numbers too,  
if they are spoken in  
sequence with pauses  
between groups of numerals.  
For instance, in reading  
aloud the telephone  
number of our business  
office, we would say, "Two  
two four (pause) six two,  
six one."

## AVOID INCONVENIENCE TO YOURSELF AND OTHERS

Always dial with care.  
Look up the number  
when in doubt.

## Satellite Television Receiving Systems

## IT'S IN YOUR BEST INTEREST TO CHECK FIRST

If you plan to build or have  
to excavate, you can avoid  
accidental damage to cables by  
checking first.

Before digging starts, Dial "0"  
Zero & ask for Zenith 07128  
(No Toll Charge)

For your own protection and  
your neighbours', it pays to  
make sure you are on "safe  
ground." A severed cable may  
put hundreds of telephones out  
of service.
