POSTAL INFORMATION

Postal Standards

Mechanized mail processing is the answer to your need for a reliable and economical postal service. 'Non-standard' mail is rejected from the mechanized system and has to be sorted manually. This means extra

processing and leads to the possibility of service delays. 'Standard' mail, on the other hand, enjoys the most modern and efficient processing possible. Postal Standards are in everybody's best interests.

Consult your suppliers about Postal Standards

When ordering stationery and forms,

when specifying printing,

when doing business with graphic designers,

tell your supplier that the product you buy must meet Postal Standards.

This information was extracted from the more detailed Canada Post Standards Manual. For your copy, contact your local Post Office Marketing Representative or your Postmaster, who will be happy to give you one.

Postal Standards

1. Size

All envelopes must be rectangular in shape. Dimensions must fall within the minimums and maximums shown below.

2. Graphics

Envelope graphics must be clear of certain areas that are required for machine processing.

Recommended location for Return Address, including Postal Code

A 45 mm (1 3/4 inches) space along the bottom of the envelope must be clear of all graphics.

3. Windows

Windows must be fully covered with transparent material that allows easy reading of the address underneath.

Windows should be just large enough to accommodate the longest address, without allowing other information to slip into the window area.

J. Smith
100 Esplanade
WINNIPEG, Manitoba
R2B 7C4

Enclosures should fit the envelope snugly to ensure that the address does not slip out of the window area.

Mr. J. Smith

WINNIPEG, Manitoba

Get The Yellow Pages Habit

In these busy days when saving time is so important, more and more telephone users are following the thoughtful way of answering the telephone: "Harry Smith speaking." Such an introduction establishes identity, saves time and makes a good impression.
