

# POSTAL INFORMATION

## Postal Standards

Mechanized mail processing is the answer to your need for a reliable and economical postal service.

'Non-standard' mail is rejected from the mechanized system and has to be sorted manually. This means extra

processing and leads to the possibility of service delays. 'Standard' mail, on the other hand, enjoys the most modern and efficient processing possible. Postal Standards are in everybody's best interests.

## Consult your suppliers about Postal Standards

When ordering stationery and forms, when specifying printing.

when doing business with graphic designers.

tell your supplier that the product you buy must meet Postal Standards.

This information was extracted from the more detailed Canada Post Standards Manual. For your copy, contact your local Post Office Marketing Representative or your Postmaster, who will be happy to give you one.

## Postal Standards

### 1. Size

All envelopes must be rectangular in shape. Dimensions must fall within the minimums and maximums shown below.

### 2. Graphics

Envelope graphics must be clear of certain areas that are required for machine processing.

Recommended location for Return Address, including Postal Code

A 45 mm (1 3/4") space along the bottom of the envelope must be clear of all graphics.

### 3. Windows

Windows must be fully covered with transparent material that allows easy reading of the address underneath.

Windows should be just large enough to accommodate the longest address, without allowing other information to slip into the window area

J. Smith  
10 Esplanade  
WINNIPEG, Manitoba  
R3B 7C4

Enclosures should fit the envelope snugly to ensure that the address does not slip out of the window area

Mr. J. Smith  
100 Esplanade  
WINNIPEG, Manitoba

**PAINTER'S TIP**

Professional painters say the correct way to hold a brush is to grasp it comfortably near the handle base. Don't bear down on the brush. Just exert enough pressure to make the bristles flex slightly toward the tip.

**MARBLE STAINS**

Most stains on marble are removed best with the application of a poultice. To make a poultice, soak a piece of white blotting paper, white napkin, white cleansing tissue, or commercial whitening in one of the following solutions: for organic stains, use ammonia or hydrogen peroxide in hair bleach strength; for oily stains, an amyl acetate or acetone solvent.
