It Takes Wires to Tie a Town Together

From your telephone—from every telephone—two wires run all the way to the Central Office. Here they are interconnected at will, quick as a wink, with any other pair . . . the basis of the system which unifies every community through voice communication.

When all “spare” wires in any neighborhood have been put in service, or all switching apparatus at a Central Office has been used up, the only way additional subscribers can be served is by installing more wires or Central Office equipment.

There are always new Central Offices to be built, and others to be enlarged to care for the normal growth of the telephone industry.

The present program of expansion is taking much time and a vast amount of work to complete, since regular telephone manufacturing was entirely suspended during the war years.

That is part of the telephone job, however, and as the work goes forward it will tie people and towns and countries closer together than ever before.

*That's What We Aim for in Publishing
the Telephone Directory . . .
to Have It 100% Correct*

BUT—with the thousands of subscribers to be listed, changed addresses, and new numbers, it is easy to see why it is possible for an error to creep in here and there.

Your name, address and telephone number in this directory are most likely correct. But, if by any chance they are not, you'll do us a favor by telephoning or writing to our Business Office.
