Yellow Pages

We bring
your world
to you.

"AGT brings your world to you
whether you're at home,
in the office or on the road."

We bring your world to you.

The Potential to Save or Waste . . . The Choice is Ours.

AGT produces 22 different telephone directories each year, for a total of 2.4 million copies, consuming 3900 tonnes of paper annually. The amount of paper is only a small percentage of the total volume of paper used in Alberta annually and it's paper that just doesn't have to be thrown away.

All of AGT's directories are recyclable. We have been working with recycling companies to make it easier to recycle the directories. We also work with our suppliers and production people to make sure the methods and products used to produce the directories are non-wasteful.

Concern's and ideas expressed by you, our customer, have resulted in many of the positive steps we have taken.

The paper we use in our directories is more than 20 percent lighter than regular newsprint and we are now testing directory newsprint that is an additional 5 percent lighter.

Our inks are made from vegetable oil, which is a renewable resource, and therefore more friendly to the environment.

The paper used in our directories contains recycled fiber. The glue we use to bind our directories is needed to hold the directory together. Research is being conducted to improve the biodegradability of the glue. However the glue does not affect the recycling process, when converting directories into such things as fibreboard, shingles and egg flats.

AGT's commitment to Quality extends to:
our customers,
our communities,
our environment.
