

**If your Telephone
sounds "dead"...**

**Wait for the
dial tone's
"go ahead"**

● There are more telephones today. More people are telephoning more than ever before. Sometimes there are too many calls for the central office dial switching equipment to handle at once.

When this occurs, there may be a short pause, after you pick up your telephone receiver, before you hear the steady

"hum-m-m" of the dial tone.

But please wait for that "hum-m-m"! If you start to dial before you hear it, you'll get either a wrong number or no number at all.

You can help yourself to better service by always waiting for the dial tone before you start to dial.

EXTENSION TELEPHONE

Now you can save yourself and the family countless steps — and enjoy the convenience and privacy of telephoning from any part of the house! For just a few cents a day, you can have an extension upstairs or in the basement—in the bedroom, living room or kitchen — in the playroom or workshop.

Why not call our Business Office NOW!

"We're adding more Long Distance lines all the time"

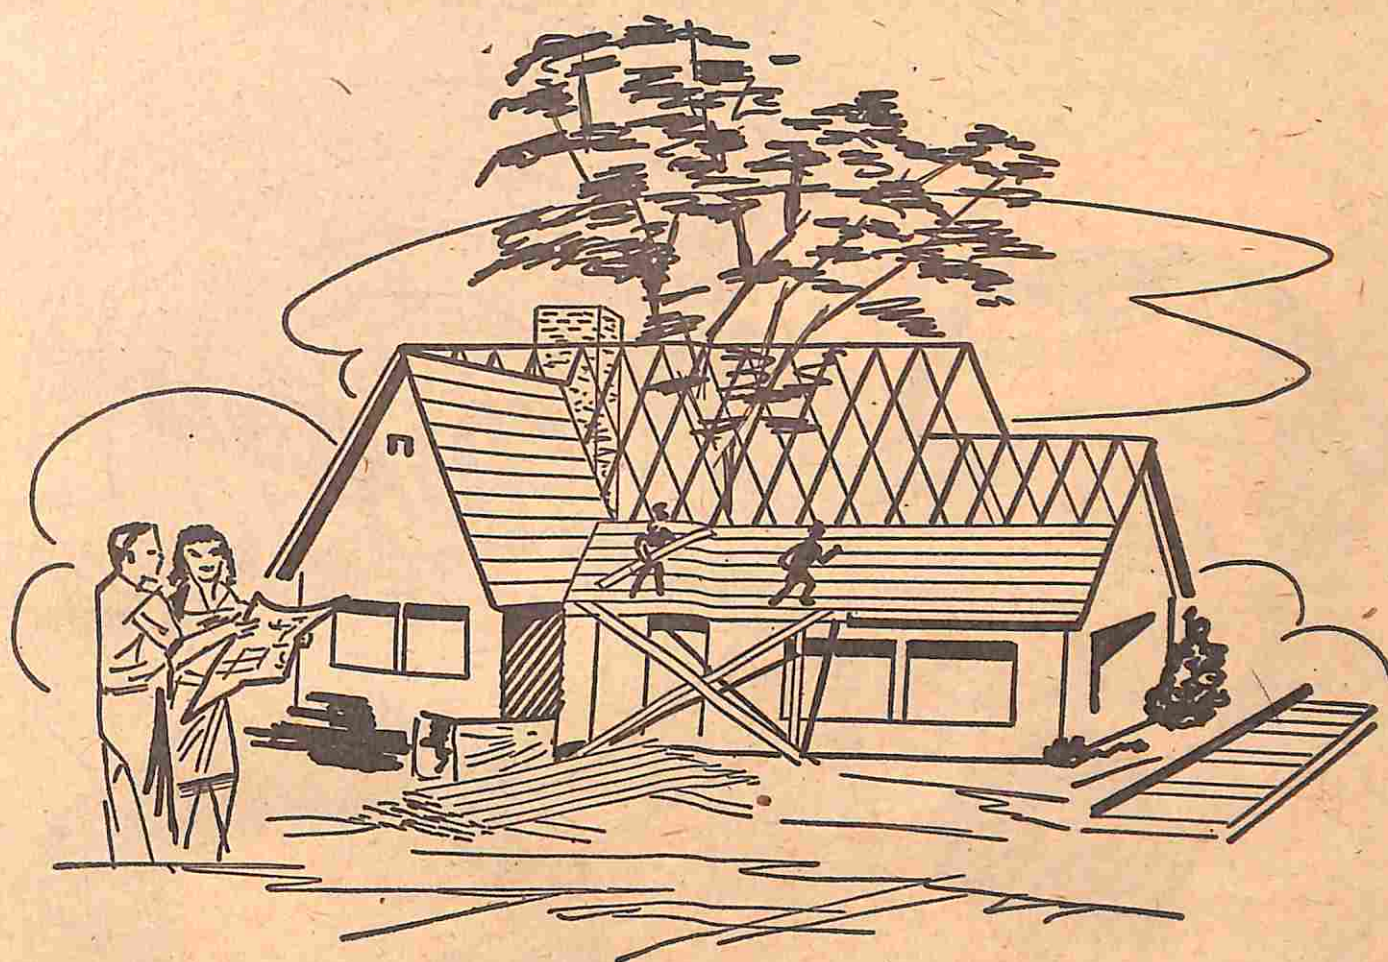

LONG DISTANCE lines are busier than ever and the number of calls is still increasing.

Though some calls are delayed, most are put through "while you hold the line." We are adding more cables and switchboards just as fast as possible

to make Long Distance service even speedier.

These additions, plus unseen technical improvements mean better service and greater value to you. Your telephone today gives you more for your money than ever before.

The cost is surprisingly low—especially after 6 o'clock in the evening and all day Sunday.

See how little it costs to call those who miss the sound of your voice.

ALBERTA GOVERNMENT TELEPHONES

Call on more customers daily by **LONG DISTANCE**

Planned use of Long Distance really pays off. On out-of-town trips, phone customers and prospects in nearby areas. You make many more calls than you could cover in person . . . with no waiting.
