WASHABLE

Hot water and the type of detergent
used in laundering woven woolen fabrics are
not the causes of shrinkage of the material.
The temperature of the water affects the
amount of soil removed, however. Water
at 120 degrees F. with a detergent will do
a much better cleaning job than at 70
degrees.

EXPLOSION IN OVEN?

If you burn the inside of the oven with an exploded potato or something, soak a cloth in ammonia and let it stay on the burned places an hour or so, after which you can scrape the spots clean without harming the enamel.

QUICK, FOR CLOTHES CARE

Colors of clothing can be altered from foodstuffs, cosmetics and perspiration that have been permitted to stay in garments. These color changes often show in acetate fabrics where blue or green turn white, or dark blue or black turn red. These color changes can be corrected if the professional drycleaner gets them soon after the soil. Otherwise, the color change may be permanent.

ONIONLESS ONION

If you like potato salad but do not like
raw onion, you might try boiling an onion
in the water in which you are boiling the
potatoes for the salad. This gives the Spuds
the flavor of onion.
