MARBLE STAINS

Most stains on marble are removed best with the application of a poultice. To make a poultice, soak a piece of white blotting paper, white napkin, white cleansing tissue, or commercial whiting in one of the following solutions: for organic stains, use ammonia or hydrogen peroxide in hair bleach strength; for oily stains, an amyl acetate or acetone solvent.

Experienced ducks and duck-hunters know
that the first requisite to success with wary,
feathered, little blokes is a good duck blind

And so it is with Yellow Pages advertising.
The advertiser who represents his firm

KNOW YOUR TEA?

A tea taster may be able to identify as many as 1,500 different teas. By examining a dry leaf, he can tell where the tea was grown, sometimes even the estate it came from, what time of year it was plucked, its probable taste and cost.
