CLEANING FURNITURE

To remove accumulations of old, discolored wax on furniture, rub it with a piece of terrycloth toweling wrung out of a hot solution of sal soda concentrated. Use about three table-spoons of the sal to a quart of water. Rinse, wipe, and let thoroughly dry before rewaxing.

To dial correctly, pull the dial all the way to the finger stop . . . then let dial return at its own speed.

It's easier to understand and jot down numbers too, if they are spoken in sequence with pauses between groups of numerals. For instance, in reading aloud the telephone number of our business office, we would say, "Two two four (pause) six two, six one."

CARE OF IRON

The bottom sole plate of an old iron can be renewed to a glistening, glasslike finish if you'll rub it with some slightly dampened salt and a crumpled piece of paper. This treatment not only smooths scratches, but removes corrosion and starch from the bottom of the iron.
