MARBLE STAINS

Most stains on marble are removed best with the application of a poultice. To make a poultice, soak a piece of white blotting paper, white napkin, white cleansing tissue, or commercial whiting in one of the following solutions: for organic stains, use ammonia or hydrogen peroxide in hair bleach strength; for oily stains, an amyl acetate or acetone solvent.

SILVER CLEANING

To clean your silver. Mix one-half cup of salt and three-fourths cup of soapflakes with sufficient cold water to cover the silverware laid in an aluminum pan. Bring to a boil, then wash silver in hot soapy water. CAUTION: Do not use on filigreed silver. Solution may remove the oxidation in the intricate designs and it will take some time for them to darken again.
