Two friendly telephone habits . . . quick to answer when your telephone rings; slow to hang up when you call someone who does not immediately respond. When calling others, remember that the called person may be almost there . . . so wait a few seconds longer.

**RIGHT WAY**

When you dial, turn the dial until your finger strikes the stop. Remove finger and let dial return by itself.

Telephone calls used to be a scream but today, a normal voice will do. The difference is improved transmission—better ways to get your voice from here to there. Simply talk in a normal tone of voice into the receiver and your words will go a long way.

You can talk over matters at once promptness often prevents loss of a customer.
