Don't forget to plan for
concealed telephone conduit
and convenient locations
for telephone outlets
when you build your new
home. These built-in tele-
phone facilities add real
value to a home yet their
cost is very small if they
are installed during
construction.

Dust, debris and pollens all affect our quality of living. A dirty furnace could potentially harm you by spreading dust and pollen throughout your home or office. Even the efficiency can be downgraded with dirty, dusty appliances. We take the first step in making your environment a healthier, safer one by offering Professional cleaning of:

WE ALSO DO FIREPLACES AND CHIMNEYS

1. We connect an industrial power vacuum truck capable of moving thousands of cubic feet of air per minute through your furnace and duct system.
2. We then perform a thorough point-by-point cleaning of the entire furnace system using compressed air and a special reverse air line tool, forcing the debris back to the truck.
3. Finally, the furnace fan and system components are cleaned, inspected and re-installed.
4. During every service, we also perform a comprehensive multi-point system check and lubrication service.
