QUICK, FOR CLOTHES CARE
Colors of clothing can be altered
from foodstuffs, cosmetics and per-
spiration that have been permitted
to stay in garments. These color
changes often show in acetate fab-
rics where blue or green turn white,
or dark blue or black turn red. These
color changes can be corrected, if
the professional drycleaner gets
them soon after the soil. Otherwise,
the color change may be perma-
nent.

GOING TO MOVE?

Don't forget the house
you're leaving behind.
Here are some helpful hints.

1. See that all utilities have been disconnected or shut off (gas, electric, telephone, etc.)
2. Notify the milkman, paper boy or others who have been delivering to you regularly.
3. Notify the Post Office of your change of address.
4. Notify your Insurance companies and secure records of transfer from school, church, bank, etc.
5. When you're in your new location have your change of address noted on your driver's license and automobile registration certificate.

WASHABLE

Hot water and the type of detergent used in laundering woven woollen fabrics are not the causes of shrinkage of the material. The temperature of the water affects the amount of soil removed, however. Water at 120 degrees F. with a detergent will do a much better cleaning job than at 70 degrees.
