HOW TO USE THE DIAL TELEPHONE

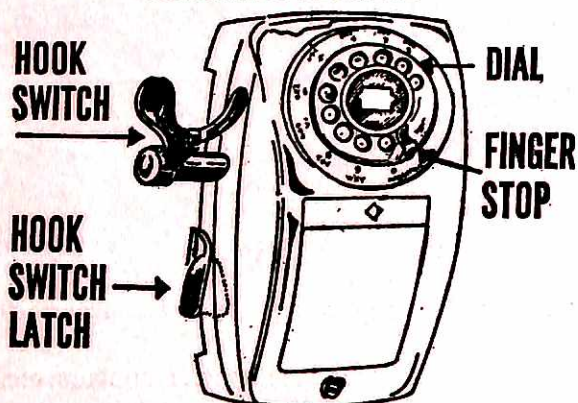

Exchange Customers:

1. **REMOVE THE RECEIVER**—Be careful not to move the hook at any time during the call.
2. **LISTEN FOR THE DIAL TONE**—A steady humming sound, indicating that the equipment is ready for you to dial.
3. **WHAT TO DIAL**—It is necessary to dial each figure of the number in rotation.
4. **HOW TO DIAL**—Suppose you are calling 843-5678. To dial this number proceed as follows:
 - (1) Remove receiver and listen for the dial tone.
 - (2) Place your finger in the hole over the figure 8.
 - (3) Turn the dial around until your finger strikes the finger stop, then lift your finger and allow the dial to return to rest without touching it.
 - (4) Repeat this operation for the figures 43-5678. If you find you have made an error before you have completed dialing, hang up the receiver for a few seconds, then remove the receiver, listen for the dial tone, and after hearing it, dial your call again.
5. **AFTER YOU HAVE FINISHED TALKING**—Hang up the receiver—this will disconnect you from the called telephone. Leave your receiver on the hook for a few seconds before starting to make another call.

Rural Customers:

...USE LONG DISTANCE...

AREA CODES and TELEPHONE NUMBERS help speed all long distance calls

Time-saving hint for long distance calls placed through the Operator: the same Area Codes needed for Direct Distance Dialing also help speed calls your Operator handles for you.

Giving her the Area Code along with the number of the telephone you are calling means faster service . . . no waiting while the Operator looks up the Code or calls the distant city for the telephone number.

The first White Pages of this directory have helpful long distance calling information, a list of cities and their Area Code Numbers.
